

WEEKLY EPITAPH.

FONTSBONE, ARIZONA, MARCH 12, 1892

Six-Page Edition.

This Page is from the Daily of Thursday, March 9.

The Nugget is a good newspaper. This is owing to the fact that all its news, local and telegraphic, is cribbed from the EPITAPH of the day previous.

THERE are now twenty-eight furnaces running almost constantly at the Leadville smelters, and from eight hundred to nine hundred tons of ore are reduced daily. The bullion for the present quarter, or from January 1 to April 1, 1892, will likely exceed that of the last quarter of last year.

THE charity of Mr. and Mrs. Cornelius Vanderbilt takes a practical turn. They have built a memorial cottage at St. John's Island, Long Island, in memory of a deceased daughter. It is to be a home for orphan girls, being adapted to the wants of twenty-six. Mr. Vanderbilt will defray all the expenses of the institution.

OUR handsome friend, the fish commissioner and clerk of the board of supervisors, has just received by express from New York a new patent double-barreled, screw-propeller opera glass, in payment for which he gives six months' advertising in the Nugget. The glass, when closed, measures thirteen inches in length, and when unwound, two feet. It is so powerful that by means of it you can look through a four-inch plank and recognize an item of news in a scrap book. The F. C. and C. of the B. of S. will find his young telescope of great assistance in viewing the blonde beauties from his private box at the Bird Cage.

THE legislative jockeys in Albany, says the New York Daily Stockholder, show a very prudent tenderness in tackling the proposed investigation of life insurance receiverships. The whole thing has been rather rough on policy-holders, but by-gones are by-gones, and it would never do to bring so many good fellows into disagreeable prominence by raking up those old matters. So, sh-h-h! If much more is said, those prying newspaper men will get hold of the facts, and then there will be a great many angry people who can't do anything to help themselves. Let us have a quiet life, and avoid all agitating topics.

THE Waitz mill, at Silver Cliff, a new process, can reduce silver ore at a cost of \$1.50 per ton. This is certainly reaching minimum figures in the reduction of silver ore. Heretofore it has generally been thought that a cost of \$9 per ton was a very low figure. The Waitz process will be a bonanza for New Mexico.—N. Mexico Mining News.

If the foregoing is a true statement, it seems that the Waitz process might be advantageously introduced into the mills of Arizona. We are free to admit that we do not believe it. One dollar and a half per ton is about the minimum cost of working the free gold ores of California, and we cannot conceive how it can be possible to work even the least refractory silver ore as cheap as gold.

THE house committee on coinage on Tuesday presented some very sensible recommendations, among them this: "So long as we have a bimetallic system (and your committee are of opinion it should and will be permanently maintained) no distinction should be made between the precious metals as currency, or as the basis for paper issued by the government and purporting to be based thereon." Again: "If behind every dollar of paper there is actually a dollar of coin or bullion, we are of opinion that nothing could be better. As the law now stands provision is made for the obtaining of certificates on the deposit of gold coin or gold bullion or standard silver dollars, and no reason is apparent to your committee why the same privilege should not be extended as a right to the holder of silver bullion." These suggestions will be accepted by the silver-producing states and territories as eminently sound. Whether they will be adopted by congress remains to be seen. At the present rate of reduction, the national debt will, in a few years, be wholly absorbed, which will naturally carry with it the extinction of the national bank notes. As we must have, for the general convenience, some kind of paper money, the gold and silver certificates will serve as the best substitute for the notes now employed that could be devised. The committee report emphatically against the recommendation of the president and the secretary of the treasury that the act requiring the is-

sue of silver certificates should be repealed and they retired from circulation. Instead thereof they assert that it should not only be retained but enlarged so as to embrace deposits of silver bullion of standard fineness. This is a substantial movement toward breaking down the wall of division between gold and silver and restoring these metals to their proper relations with each other.

MARCH 1st there was in the United States treasury \$252,617,648.17 or about two and a half times as much as Vanderbilt is credited with being worth.

In considering the action of the city council last evening, in removing the restricted limits to houses of prostitution, we are forced to believe that the councilmen from the first and second wards reflected in their negative votes the sentiments of the great mass of the people of Tombstone. If we are to have a plague-spot, let it be confined to as small limits as possible.

NEARLY two hundred thousand dollars of the money sent to Indiana by the Republican National committee is missing. It will be remembered that Dorsey "carried Indiana." What became of the money? In the early days of the star route investigation, when it was believed that Dorsey was trying to make Brady the scapegoat, George Gorham asked the same question. An exhibit would be interesting.

A committee on sewers, consisting of Councilmen Nash, Dean and Atchison with city Engineer Keller, was appointed last evening, who are to report at the next regular meeting of the council. The committee, accompanied by Mr. Haskins who represents the concrete pipe, made a tour of the district proposed to be sewered, this forenoon. It is to be hoped that speedy steps will be taken to have sewers laid through Allen and Fremont streets including Fourth and Fifth. Those who nightly had to inhale the stench of the flowing slops all last summer, feel a lively interest in this matter, and those who happen to be indifferent, would curse themselves and the city authorities if the present condition of affairs continues until an epidemic of diphtheria, scarlet, typhus or malarial fever breaks out and carries off some cherished member of their family. A cotagion of scarlet fever and diphtheria broke out in the little town of San Luis Obispo, California, last summer, induced by imperfect sewerage and scarce a family escaped without the loss of some dear one. The same ravages may be expected here if prompt action is not taken to improve the sanitary condition of the city. An ounce of preventative is worth a pound of cure, and particularly in this case.

Gov. Tittle in Prescott. The Prescott Courier gives our new governor the following welcome: Our new governor, Hon. F. A. Tittle, arrived here yesterday from Tucson, more or less fatigued, on account of recent sickness and the stage ride. He passed the day with Mr. Sol. Lewis, F. W. Blake and other old Nevada acquaintances, complimented Prescott and her people, retired early, and, we suppose, slept soundly. He proposes to stay with us a week or so; then go south and come back to reside here permanently, in the summer. We haven't seen him, but as he is well-spoken of, we welcome him to the handsomest town in Arizona.

Each a Greater Villain than the Other. From the Wall Street Daily News. During the wild-cat days in the West a Brooklyn man, who died not long since, was in business in a Michigan town, and formed a close friendship with the cashier of one of the private banks. One evening the cashier admitted that he was laying his plans to rob the bank of all its funds, and skip into Canada, and his friend permitted himself to be drawn into the plot. They were to skip together and share alike, and a certain date was mentioned for the affair to come off. The Brooklyn man sold out his store at a big sacrifice and went to Detroit, where the cashier was to join him with the stolen funds. The hour came and the cashier came, but he had no sparkle in his eye. "Busted—busted all to pieces!" he groaned in explanation. "Didn't you get the money?" "Not a cent!" "How's that?" "Why, the president skipped out Sunday night, the secretary followed him Monday morning, and the whole board of directors disappeared that night. On Tuesday morning there wasn't an infernal dollar left to steal!" "There wasn't?" "Not a one! Just think of the meanness of the whole board jumping in and stealing the cashier blind as a bat! Where will human meanness end?"

THERE seems to be a fearful state of impoverishment in Texas. The State has \$5,000,000 in her treasury, and is not able to have a safe place of deposit for the money.

CHAP'S REPORT. The Health Officer, Street Commissioner, License Tax Collector, and Pound Master (All in One) Tells What He Knows About the Condition of the City.

HEALTH OFFICE. Commenced February 23d, 1882, under the direction of the mayor and council. I employed a man, horse and wagon to remove filth and garbage from the public streets, alleys and backyards; 57 loads have been removed outside the city limits at an expense of 75 cents per load. I have caused the removal of 75 public nuisances which were complained of as existing upon the streets by the citizens, which was generally done at the expense of the owner of property in front of which the nuisance was maintained.

On the morning of the 24th ult., I visited the pest house, by your direction, and ordered necessary improvements and repairs to the same, and had a new floor, door and windows, and a stove put in and constructed, and placed the house in a comfortable condition.

A report of the existence in the city of small pox being generally circulated among the people, I accompanied Dr. Giberson to visit a number of patients whom it was alleged had this disease; but on examination by him I was informed that the patients were afflicted with the measles only. By direction of the mayor, I also accompanied Dr. M. Swegan to visit a sick man on Allen street, between Seventh and Eighth streets, and from his appearance and symptoms at that time the doctor believed it to be a case of small pox. I at once placed upon the house by direction a yellow flag. It subsequently appearing, however, that the case was not small pox, I at once removed the flag.

On the night of February 23, the carpenter at the pest house came into town and informed me that the patients were destitute of provisions and necessary comforts. We aroused the mayor from his bed and notified him of the fact, who ordered that all necessary food, etc., should be sent at once for the use of the patients, which I did accordingly.

I have the pleasure to report to your honorable body that after careful examination made in various parts of the city I have been unable to discover the existence of any case of small pox or other contagious disease, and with the exception of the one or two cases in the pest house, that none other has existed or prevailed in our city. I also report that no epidemic exists, and that the citizens are comparatively healthy.

STREET COMMISSIONER. Since my appointment as street commissioner I have caused a number of repairs to sidewalks on our business streets to be made, also caused the removal of several obstructions of streets and sidewalks, and attended to all complaints found upon the complaint book kept in the clerk's office, for the use of aggrieved citizens. The above repairs have been done at the expense of the owner or occupant, without cost to the city.

FIRE WARDEN. As fire warden I have caused many dangerous and poorly constructed flues, stove-pipes, etc., to be removed and replaced by proper ones.

On the night of February 2, 1882, a fire broke out in the store-room of D. Calisher, at No. 527 Allen street. I proceeded in company with Mr. McCann, the chief engineer, to make immediate examination as to the cause, and from all evidence presented and discovered by us, we were fully satisfied that it was caused by the act of an incendiary, but was not able to determine the guilty party or parties; coal oil and other combustible material were strewn about the store, and not yet consumed; and strongly induced the above conclusions. Through strenuous efforts on the part of the fire department and the police, as well as directed aid on the part of the citizens, the fire was quickly extinguished, thus saving the city from a serious conflagration and probable destruction. I also report that the Way-Up lodging house and two other buildings were destroyed by fire on Sunday, the 6th inst., but by the timely appearance of the department, the fire was confined and not allowed to spread. This fire was undoubtedly caused by accident and not by incendiarism.

LICENSE TAX COLLECTOR. Since assuming the duties of this office, about the middle of the quarter ending March 31, 1881, I have collected the sum of \$704.52 from licenses, a large number of which were fractional, but in all such cases I have exacted from the applicants affidavits as to the time of commencing said affidavits have been turned in to the auditor, representing cash on settlement with that officer. In the performance of the duties of this office I have met with but isolated instances of refusal to pay, but parties have thus far made settlement without being compelled to do so through the courts.

POUND MASTER. I regret to say that in consequence of my whole time being consumed in the discharge of the duties required by the above offices, I have as yet been unable to give any attention to the impounding of animals, collection of dog tax, etc.

I would beg to suggest to the city council that the city is not provided with a pound, nor are the facilities and conveniences in this department complete or satisfactory. All of which is respectfully submitted.

GEORGE W. CHAPMAN, Health officer, etc.

Mr. A. Magee, traveling agent and correspondent for "Pacific Life," is a guest at the Comopolitan hotel.

LATEST TELEGRAMS.

(Special Dispatches to the EPITAPH)

Great Railroad Strike. OMAHA, Neb., March 8.—Some ten days ago, 100 or more men engaged in grading for the B. & M. R. R. Co., demanded \$1.20 per day. This request was complied with, and they then struck for \$1.50, which was also complied with. They then demanded \$1.75, which was refused; then they stopped work. Since then a number of meetings have been held and a labor union organized, numbering over 1,000 members, and the rate fixed by the union at \$1.75 per day. The union held a grand demonstration, over 2,000 men being in line, and headed by a band, paraded the streets this afternoon.

The procession of laborers then proceeded to a place where some 100 men were engaged grading under guard of a large force of special policemen. The men seemed to be afraid and fled leaving behind them coats and dinner pails. The crowd proceeded to cut the horses loose from the scrapers, scatter the tools and commit other riotous proceedings by the thousands. The special police were roughly handled and badly beaten. One policeman rescued at them and was with difficulty freed from the fury of the mob by a strong force of police men. Great excitement prevails. Prominent strikers say that graders shall not work any more for less than \$1.75 per day. At 5 o'clock the mob dispersed but it is feared that the worst is still to come. Mayor Bidwell has called on the governor for military protection.

Book About Grant. WASHINGTON, March 9.—General Grant is not the wealthy man he has been represented to be. He is very much in need of the pay provided for in Gen. Logan's bill restoring him. At present, according to trustworthy reports, he is without any personal income. The house given him in New York was deeded to his wife when Gen. Grant thought he had a fortune in the fund collected for him by Jones, publisher of the New York Times. Jones collected for him \$25,000. The money was invested in Wabash railroad stock, which has depreciated in value to such an extent that no income is obtained. None of the investments that Grant has made in New York have been successful. He has been tried as president and director in a great many concerns, but he draws no money, so he is being gradually dropped by investors, who were anxious a year or two ago to carry him for the advantages his name might give them. His son, Buck Grant, is quite rich, and making plenty of money. The general's position, however, is full of embarrassment. It is from a partial knowledge of General Grant's condition that his friends have been so earnestly urging the bill for restoring him to the army. It is now, however, pretty certain this bill will fail in the house because the democrats have already agreed upon a policy which, if carried out, will defeat the measure.

The Great Monopoly. NEW YORK, March 8.—At the annual meeting of the Union Pacific railroad to-day the following directors were elected: Sidney Dillon, Elisha Atkins, Frederick L. Ames, Ezra H. Blake, S. H. H. Clark, F. Gordon Dexter, Daniel Dows, Greenville M. Dodge, T. T. Eckert, Jay Gould, Solon Humphreys, Russell Sage, Augustus Schell, Wm. H. Scott and John Sharp. At a subsequent meeting of the directors Sidney Dillon was re-elected president and a quarterly dividend declared of 12 per cent. Total earnings this year were \$24,258,817; last year, \$22,455,134. Expenses this year were \$12,480,343; last year, \$10,545,119. Net earnings this year, \$11,778,474, against \$11,910,015 last year. The decrease in net earnings is accounted for by the fact that the company laid \$590,794 worth of rails in excess of last year. The debt of the company is \$4,035,078, which is more than covered by available bonds, securities and supplies on hand.

The Floods in Bolivia. MEMPHIS, March 9.—E. H. Moore, an attorney in Bolivar county, reports breaks in the Hushpuckee and Lake Charles levees Monday night. The former is the largest levee in Mississippi, and three breaks submerges the entire county of Bolivar. At Rosedale the water is ten feet deep in all the dwellings. Of three hundred inhabitants only three families remain, and they are living in the garrets of their houses; all others sought safety elsewhere. The levee immediately in front of Rosedale is crowded with negroes, mules and cattle. The negroes, to the number of about 500, have no shelter, and are existing on cattle which they kill. Their condition is terrible. They have been expelled for the past two days to cold, dreary showers.

The Avengers in New Mexico. ALBUQUERQUE, N. M., March.—At Las Lunas yesterday Chas. Shelton, John Redmond and Harry French were taken from jail and hanged to the nearest trees by masked men. Shelton murdered Foreman Woodruff last fall, Redmond killed Jas. McDermott last January at Gallup, on the Atlantic & Pacific railroad. French, alias Simpson, was one of a band of desperadoes who killed Deputy Sheriff Jones at Crane's. The mob also took two negroes from the jail, and beat them unmercifully and turned them loose.

Resolutions Adopted. CHEYENNE, WY., March 8.—In the territorial legislature to-day a resolution expressing confidence in Governor Hoyt and approval of his course for the past four years, was unanimously passed. Also request-

ing the president to re-appoint him. A resolution was also passed praying Congress to pass a bill giving Lieutenant Schwatka full pay instead of half-pay while in command of the late Franklin search expedition.

Minister Lowell on the Coercion Act. LONDON, March 8.—Lowell United States minister, in replying to the application made on behalf of American citizens arrested in Ireland, says the coercion act is contrary to the spirit and fundamental principles of both English and American jurisprudence, but is the law of the land and controls all persons domiciled in any of the proclaimed districts of Ireland whether British subjects or not. It is manifestly futile that naturalized citizens of the United States should be exempted from the operation of the act.

A Marshal Prisoner. CHICAGO, March 9.—A Helena, Montana, special says: The United States marshal here has received a dispatch dated the 3d, from his deputy, John Healy, saying that he is a prisoner among the half-breeds and Indians, in their camp on Milk river. The country is full of smugglers and illicit traders, and he had arrested six of the leading men and captured \$3,000 worth of robes, when Indians captured him and his outfit. He asks aid from Fort Assiniboine, as there are not troops enough at Poplar river, and the Sansas Indians are ready for war. Marshal Botkin has directed aid to be sent.

Later information is that Gen. Rucker, the commandant at Fort Assiniboine has sent seven companies of infantry and two of cavalry numbering 400 men under Captain Norwood to the scene of trouble with instructions to rescue Healy and drive the half-breeds and Grees back into British territory, whence they came from. It is feared Healy and his companions may be butchered before the troops arrive.

Arrested for Murder. DALLAS, TEX., March 8.—Frank Clanton, who, it is alleged, murdered J. W. Norris, postmaster of Price Station, about ten days ago, was arrested in Fort Worth on Monday. It was at first believed that Norris was killed by parties who did not want him to appear as a witness in a case pending in Ellis county, but Detective Duncan fastens the crime on Clanton, who killed Norris for plunder, and, becoming horrified at the deed, fled the country without robbing him. There was a large reward for Clanton.

Suicide. SAN FRANCISCO, March 9.—E. T. Kennedy committed suicide in his own room at the Russ House last night by taking laudanum. Deceased was employed on the Alta as leading writer for some weeks past. He left a letter to a fellow-journalist, which shows the act to have been the result of despondency and disgust with life. Deceased was a man of much ability, but of delicate organization, sensitive disposition, and at times addicted to the use of stimulants.

Congressional Proceedings. WASHINGTON, March 9.—The senate at 1:40 p. m. resumed consideration of the Chinese bill, and Hailey took the floor in opposition.

A resolution passed instructing the secretary of state to ascertain the cause for the imprisonment by the British government of Daniel McSweeney, a citizen of the United States, and late a resident of California.

Waiting to Some Purpose. NEW YORK, March 9.—The pedestrians received to-day: Hazel, \$9380 gate money and \$5000 sweepstakes; Fitzgerald received \$4750; Noremack, \$2271; Hart, \$1593, and Sullivan, \$175.

The Arkansas Mill Rising. LITTLE ROCK, Ark., March 9.—There has been steady rain for the past three days at Arkansas City. The river rose an inch from noon to 5 p. m. to-day.

Train Wrecked. KNOXVILLE, Tenn., March 8.—Yesterday a passenger and freight train on the Knoxville & Ohio railroad, was wrecked near this city. Eight men were wounded, but none killed.

Assassination. MOUNT VERNON, Ky., March 8.—Mary Sigman (a famous scarlet woman of Roundstone) and her mother were assassinated by an unknown person.

River Rising. MEMPHIS, March 9.—The river has risen two inches since yesterday. The high winds may destroy the levees at Helena and Friars Point.
